Project Stage Implementation
Duration 2019 - 2021

Conservation Support > District Technical Assistance (ISWCC)

This project is part of the Division 4 Soil Health Sampling Project. It consists of assisting the district with 3 collection sites for Soil Health analysis. The district has made a five year commitment to determine effectiveness of soil health improvement from incorporating BMPs of cover crop (340), and residue and tillage management, no till (329) operations. Requests will need to be made annually to the Commission should the district desire continued technical assistance. Hours reported reflect coordination with the district, NRCS, and U of I to implement soil health sampling.

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
